

Master-Clip Scaled Hoses

Double-layered hose design with scales on inner hose lining

Construction

Material

- clip profile spiral: hot-dip galvanised steel band
- wall: single-/multi-layered Master-Clip special hose, abrasion resistant and/or temperature resistant fabrics or foils with outer hose from standard Master-Clip range

Applications

- Welding fume extraction with greater degree of flying sparks
- Exhaust gas extraction
- Loading technology
- Applications, for which abrasive particles or sparks are to be kept away from the external hose material by the internal scale-like design of the hose
- Sieving technology

Properties

- outer chafing protection spiral
- depending on the materials applied
- high tension-proof connection of wall-lining and spiral via special clamp mechanism
- highly flexible
- smallest bending radii
- compressible

Temperature Range

- depending on materials used

Available on request

- Available on request in other lengths, other sizes, in different colours
